Configuration file '/etc/grub.d/35_fwupd'

==> Deleted (by you or by a script) since installation.

==> Package distributor has shipped an updated version.

What would you like to do about it ? Your options are:

Y or I : install the package maintainer's version

N or O : keep your currently-installed version

D : show the differences between the versions

Z : start a shell to examine the situation

The default action is to keep your current version.

*** 35_fwupd (Y/I/N/O/D/Z) [default=N] ? y
